NEW AUTO LAW GOES INTO EFFECT SEP. 15TH.

PHOENIX, Ariz., Aug. 29.—Owing to some miscommunications in the date of its passage, the automobile law which was thought to go into effect last Thursday will not go into effect until the 15th of September. The premature announcement caused quite a flurry in the office of Secretary of State Osborn, who, although he had made preparation for issuing the required licenses and seals under the law, was unable to do so because of the non-arrival of the equipment.

Under the provisions of the law the licenses, number and seal are issued to the applicant owner of the automobile. These are expected to arrive in time for the opening date of the enforcement of the law and in sufficient numbers to satisfy the demand that will be made. The number of autos in the state is unknown, but it will soon be found out when the licenses are all made out and sent.

MISS DOROTHY DRAPER.

First American Subject to Sit for a Photograph.

Seventy-two years ago Miss Dorothy Catherine Draper posed as the first subject for a photograph in New York City. Her brother Professor J. W. Draper making the picture which took an exposure of five minutes in the glare of the noon day sun. Today with the soft light of the up-to-date studio, coupled with fast lenses and quick plates we are able to take your photograph in the fraction of a second. Under these clever conditions it is a pleasure to record for our friends a pleasing photograph. The Risdon Studio makes them, on East Side.

E 59 Take **CARDUI**

The Woman's Tonic

Mr. J. W. Church writes from Summit, N. C.: "My wife had been ailing for years. She suffered agony with her side and back. Our family physicians treated her without relief. After taking Cardui, she gained at once. Now she is red and rosy as a school girl." Cardui has been in successful use for more than 50 years. Try it.

JOHNSON CAMP IS BUSIER THAN EVER

It is Predicted That Over 500 Men Will Be Employed Within Two Months.

WILCOX, Aug. 28.—It is predicted that within two months nearly five hundred men will be employed at Johnson. This camp has reopened and some great discoveries have been made. Mining surrounding Wilcox has taken a wonderful leap the last six months owing to the high price of copper. The mineral belt surrounding the town has had but little development.

DURUM OR MACARONI WHEAT

In Dry Northwest It Has Met With Considerable Favor—It Resists Drought Splendidly.

Durum wheat is generally grown as a spring wheat. In the dry northwest it has met with considerable favor. It generally out-yields spring wheat and resists drought splendidly. The greatest objection to growing macaroni wheat in this country has been the lack of market, the millers at first discriminating against it. Analyses indicate that Durum wheat has a high value for feeding purposes, being considerably richer in protein than ordinary wheat, says the Wallace's Farmer. It is so hard, though, that it must be ground before being fed. We have reason to suspect that a larger amount of feeding nutrients can be obtained from an acre of Durum wheat in a dry season than from any other spring grain unless it be barley or corn.

Durum wheat does not stool quite as much as ordinary spring wheat, and consequently should be sown a little thicker. A bushel and a half to two bushels to the acre is about right.

Clean Milk Pails.

When pails are left around with milk clinging to them the bacteria grow and multiply at a tremendous rate.

In order to have wooden utensils endure service better and keep pure longer, wash them in cold water before they are scalded.

Frighten Hawks.

Where hawks are troublesome, burn old leather in or near the chicken run. The smoke and smell together are sure hawk scarers, as several who have tried it can testify. Save a few old shoes for this purpose.
